

Nancy Lowery**Assistant Director**

As Assistant Director of The Hub of Human Innovation, Nancy Lowery is responsible for operations development, client mentoring programs, and overseeing day-to-day operations.

Prior to working for the Hub Ms. Lowery was Technical Coordinator for the Bi-National Sustainability Laboratory a non-profit whose mission is to “create an economically rich and vibrant United States/Mexico border anchored by innovative and competitive enterprises”. In this capacity she worked with technology based start-ups to advance their business development and with regional economic development organizations to promote entrepreneurship and innovation.

From 1991-1998 Ms. Lowery worked for the Center for Environmental Resource Management at the University of Texas at El Paso where she was responsible for project management, research design, proposal writing, data collection and analysis, and student and staff supervision. While at UTEP, she was Principal Investigator, Co-PI, and/or Project Manager on research projects totaling 2.8 million.

Ms. Lowery holds a BA from St. Lawrence University with degrees in Political Science and English Literature and an MA from University of Texas at El Paso in Political Science. She has extensive experience in, and knowledge of, economic development, and environmental policy/natural resource issues affecting the U.S./Mexico border region.
